

## What do I like about family life?

*Key skill – working with people*

*Sociology skill – questionnaire design*

*These questions are **open ended** – that means you can write in your own answers and show your own feelings.*

1. Who are the most important people to me? (List a number of people whom you really care about, even if you feel that you do not like them all of the time!)
2. What are the three things that I like best about being a member of a family?
3. In what ways would my life be harder than it is now if I had to live on my own without help from my family?
4. How do people in my family help each other? (Make a list of all of the various things that people in your family do to help other people such as aunts, grandparents or even you!)
