Certificate in Digital Applications

(part of the DiDA suite of qualifications)

Exciting and motivating, DiDA is a revolutionary suite of ICT qualifications, focusing on ICT as a powerful tool for real life.

Inspiring and challenging

DiDA promotes creative use of digital applications. Its real-life, outcome-driven approach inspires and challenges learners to demonstrate what they know and are able to do in authentic contexts.

Modern and future-proofed

DiDA is a modern suite of qualifications that is designed to equip learners with the skills they need to live, learn and earn in the 21st century. The 'next generation DiDA' specifications are being prepared for September 2012

Creative and collaborative

DiDA enables learners to progress from passive consumers to active producers of quality digital content. It develops their ability to organise themselves and their work and encourages them to reflect critically on their own and others' use of ICT.

This two year course covers DiDA Unit 1 'Using ICT' plus one of the suite's optional units and provides a qualification the equivalent of two GCSEs (A*– C).

Assessment

For each unit learners complete a substantial project and showcase their achievements in an eportfolio. Eportfolios are internally assessed and externally moderated. For unit 1 learners will also be required to demonstrate their skills in a practical test completed in examination conditions.

For additional information please see Mr M Gillies (room 215)
